Introduction

Mobility India (MI) established in Bangalore, as a registered society in **1994** has been a progressive force in the disability, development and rehabilitation sector.

Professional development of human resources in the field of disability is vital to the entire process of rehabilitation. However, the demands for the rehabilitation professionals are still high. This creates a void, a shortage of these professionals in the remote and rural communities, conflict affected regions especially North-Eastern states in India as well as in low and middle income countries. To combat this shortfall, Mobility India has been incessantly working towards educating and training professionals across diverse rehabilitation programs.

Mobility India has the credit of being the only institution in South India commencing and **continuing the Prosthetics & Orthotics (P&O) course since 2002** successfully. In addition, Mobility India attains the status of the only institute in India to acquire **international affiliation** (International Society for Prosthetics and Orthotics complete CAT II).

The education and training programmes conducted by Mobility India belongs to the domains of assistive technology, prosthetics, orthotics, rehabilitation therapy assistant. Apart from this, Mobility India conducts Wheelchair Service Training Package (WSTP) for Basic, Intermediate and Manager level professionals as per WHO guidelines, Continuing Rehabilitation Education (CRE), workshops, seminars and conferences. MI also provide Internship and research opportunities.

Course on Prosthetics & Orthotics

Prosthetics and Orthotics courses instruct students in the principles of designing and fabricating prostheses and orthoses, developing patient evaluation skills and creating individualized treatment plans. Patient volunteers participate throughout the span of the program allowing students to gain practical experience in all aspects of the clinician-patient experience.

Who are Prosthetists & Orthotists

Prosthetists & Orthotists are qualified **Allied Health Professionals** who assess and treat the physical and functional limitations of people resulting from illnesses and disabilities, including limb amputations. They are trained to prescribe, design, fit and monitor Prostheses & Orthoses.

Career Prospects

- ★ Government & Non-Government Rehabilitation Centres
- ★ International Agencies
- ★ Self-Employment
- ★ Research & academic institutions
- ★ MNC
- ★ Major Hospitals
- ★ Higher Studies

Bachelor in Prosthetics & Orthotics (BPO) 4½ Years
