

14 years old Surya hails from Krishnagiri District, Tamil Nadu. Parents and a sibling is family to him. His father works in agricultural land with a seasonal income, which makes it difficult to manage the household needs let alone additional expenses.

Unlike children of his age, Surya does not attend school. Though quite interested he could not join his friends for playful activities. All this is attributed to his reduced mobility due to Cerebral Palsy in an early childhood. Doctors suggested for therapeutic interventions but in his small village there is hardly any scope for it. This forced Surya to lead a solitary childhood.

Recently he was brought to MI for appropriate intervention. He was provided with a Twin Device to assist him in sitting and standing with support. This brought a wide smile on his face and his parents were happy for the support extended to Surya.
