

Dreams on Wheels: Story of a boy who aspires to become a Scientist

Mohammed Danish, a 11-year-old boy studies in 5th grade and aims to become a Scientist in future. His dreams are not blocked by his disability. He enjoys studying and perform well in class. However, he is diagnosed with Spinal Muscular Atrophy (SMA) which is a genetic disease affecting the part of the nervous system that controls voluntary muscle movement. Due to this, his physical condition has been affected severely, he is unable to walk and stand. He visited MI in 2011 for the first time and went through complete assessment- he was provided with bilateral Ankle-Foot Orthosis and Knee gaiters to support his mobility.

Recently, he visited Mobility India for the wheelchair support to increase his mobility. Danish says, 'With wheelchair I can go to school regularly and focus on my studies'. Danish is a boy full of dreams and hope, his mother continuous support and encouragement keeps his determination going even when things are tough.

MI highest priority is to work for children like Danish and support their inclusive development.

**With your support, we can together bring a change
in the lives of more children like Danish!**
