

Chandan C, a 12-year-old boy lives in Bangalore. He is the only child to his parents, his father works as a painter to run the household. Chandan was born premature and his birth cry was delayed due to which he was diagnosed with Cerebral Palsy, which delayed his age appropriate milestones.

Being the parent of a child with special needs is challenging. Chandan's mother takes every single step with his child to make his life better. Before coming to MI, Chandan was not able to stand or sit without proper support, he could not perform the activities of daily life by himself. His parents brought him to Mobility India where Chandan was provided with regular therapy interventions and was fitted with bilateral AFO and rollator was provided to support his mobility. Consequently, his mobility has increased to a point where he now moves around his home freely.

Chandan's mother thrives with hope to see his son become the best version of himself with the continuous support of mobility India. Chandan's mother says, 'Mobility India has helped in providing good quality of life for our son through the equipment's. We are hoping that it will continue the same'.

We, encourage mother's like Chandan's to never give up on their children as with right support and treatment, they can be the Champion of themselves.

Your donation can make real change for mothers in need.
