

More power to Mother's like Jubedha

Jubedha Begum, a mother of 2 children is diagnosed with diabetes and was under medication. After few years, she developed an infection on her right leg due to which her leg was amputated to prevent the infection from growing.

Her husband works in a shop and she was a tailor, together they managed to run their household. However, after her leg was amputated she could no longer work to support her family. Jubedha was distraught by the fact that she could not support her family income and couldn't play with her children anymore. She felt helpless in sitting idle at home and started cultivating negative thoughts about herself.

Fortunately, she remembered of the Mobility India team member whom she met at hospital mentioning about the artificial limb. She visited Mobility India, where she was fitted with a right prosthesis and provided with gait training.

Now, Jubedha is a happy person, she can stand by herself and can help her children in the day to day activities. Jubedha is a mother who finds her happiness in the happiness of her family. She is extremely grateful to the MI team and the donor who make these assistive products accessible to people like her. She hopes to get back to her tailoring work soon.

MI, seek for your continuous support in delivering these services to mother like Jubedha and more on this mother's day!
