

**Director General,
Indian Spinal Injuries Centre, New Delhi**

Message

Dear Friends,

It is a pleasure to welcome you for the National Conference on Assistive Technology for ALL-2030 which will be organized in NIMHANS Convention Centre, Bangalore on August 2-3, 2019 under the theme of “improving access to quality and affordable assistive technology”.

Assistive Technology and Assistive Technology Products(ATP) help persons with disabilities and older people to overcome impairment and improve the quality of life and also help them to integrate in the society.

WHO reports that with social development, ATP demand will increase while there is already a shortage of ATP in developing world.

In this conference an attempt will be made to focus on these issues and make a Roadmap for persons with disabilities and older people in India and other developing countries.

Please come and join us and make the program a grand success.
