HYBRID COURSE ON SEATING AND MOBILITY SOLUTIONS

(As per WHO Guidelines)

*Enjoy
Flexible Learning /
Live Practice /
Diverse Wheelchair
Solutions!*

+ Hands-on Practice

Training Duration (Tentative) | Feb 6th - Mar 21st, 2026

COURSE RATIONALE:

Seating and positioning system in wheelchair provide the user with the postural control necessary for daily activities, the maintenance of independence, and interaction with the environment (Fernando Vicente de Pontes et.al, 2021). The recent evidences show that best seating and positioning system is one of the most challenging tasks for healthcare professionals to assess which components best meet the needs of a wheelchair user, a critical gap in clinical practice.

To address these gap, Mobility India organizes an exclusive hybrid-mode training program comprising online theory sessions and hands-on practical sessions under the Wheelchair Service Training Package (WSTP) – Intermediate Level. The workshop aims to strengthen the competencies of wheelchair service personnel in assessing, fitting, and providing appropriate manual wheelchairs and cushions for individuals requiring additional postural support to sit upright or near upright, in alignment with International standards.

CONTENTS :

- **Postural assessment** to identify the best possible mobility and seating solution for them
- **Master 24 hours positioning** for improved comfort and long term outcomes
- **Familiarisation** to adjustable, affordable, transportable paediatric postural support wheelchairs
- **Prescribing, preparing and fitting** appropriate wheelchair with cushion and postural support devices or modifications
- Clinical expertise in **design and fabrication of postural support devices (PSD)** on wheelchair
- **Training of wheelchair users** and their carer to make the best use of their wheelchair
- **Carrying out follow up** to evaluate the effectiveness of wheelchair user's wheelchair and seating solutions
- **Explore intermediate manual wheelchairs** across quality and cost level
